35. My friend said his o\_\_\_\_\_l impression of my new restaurant was good, but there was still room for improvement.

第三部分閱讀測驗 20%@4%

In the realm of modern architecture, the impulse to create extraordinary structures often confronts traditional design principles. Contemporary architects must justify their bold visions while accommodating practical needs.

The strain between innovation and functionality can be deadly to creativity if not properly maintained. However, when executives and designers collaborate, they can generate ideas that exceed expectations. Prior to breaking ground, extensive planning is crucial. Diplomats in the field presume that a well-conducted study can boost a project's chances of success. This sentiment is shared across the industry, as fluency in both artistic vision and technical skills is essential.

Residents often view new developments with a mix of excitement and insecurity. It's the architect's job to alter these perceptions and create spaces that inspire awe. By phasing out outdated concepts and embracing originality, we can transform cityscapes in unprecedented ways. The bureaucracy of city planning may seem like an insurmountable obstacle, but with patience and persistence, extraordinary designs can become reality.

36. What is the main idea of the article?
- A. The impact of traditional design principles on modern architecture
- B. The importance of collaboration in modern architecture
- C. The process of planning in modern architecture
- D. The role of architects in transforming cityscapes
37. According to the article, what is essential for architects in the field of modern architecture?
- A. Extensive planning and study                      B. Breaking ground without any planning
- C. Being fluent in technical skills only              D. Ignoring artistic vision
38. What does the article suggest can happen when executives and designers collaborate?
- A. They can create structures that defy traditional design principles.
- B. They can generate ideas that exceed expectations.
- C. They can struggle to maintain creativity.
- D. They can overlook the practical needs of a project.
39. What does it mean to "break ground" in the context of the article?
- A. To demolish existing structures                      B. To begin construction on a new project
- C. To introduce new design concepts                      D. None of the above
40. What is the sentiment shared across the industry regarding the success of a project?
- A. Extensive planning is crucial.
- B. The strain between innovation and functionality is deadly to creativity.
- C. Architects must justify their bold visions while accommodating practical needs.
- D. Diplomats in the field presume that a well-conducted study can boost a project's chances of success.
