IV. 閱讀測驗 一題兩分，共 14 分。

1.

If you've ever been at an airport, you may have seen a sniffer dog in action. Sniffer dogs have an incredible sense of smell and are used by officers to detect various smells. Here are a few facts about these amazing dogs.

Fact 1

Sniffer dogs are trained to detect specific smells and to alert their human masters to them. These smells include those of drugs, weapons, money, and food. However, the list still goes on, since sniffer dogs have extremely sensitive noses.

Fact 2

A trained sniffer dog can pick up smells even when they are masked by other smells. In other words, the dog is able to tell the difference between multiple* smells that are mixed together. This makes it useful for locating specific smells.

Fact 3

A dog's sense of smell is at least ten thousand times stronger than ours. Aside from their wonderful sense of smell, dogs can search a specific area up to four times faster than we humans can, and they also do it much more accurately.

Fact 4

Even though huge advances have been made in security methods, dogs are still thought to be the most effective of all bomb detectors. When it comes to sniffing things out, it seems that nothing can beat man's best friend.

1. We all know that plastic pollutes our environment. As individuals, however, what can we do about it? To begin with, we could each try to produce less plastic garbage. Here's how.

Carry a shopping bag

Instead of asking for plastic bags at the store, bring your own shopping bag. Better yet, keep one at all times in your normal daily bag. This way, you can avoid plastic bags in case you decide at the last minute to go shopping.

Stop using disposable plastic utensils and food containers

When you buy food to take away, it'll likely come with plastic utensils and containers. Consider carrying a pair of chopsticks or a fork in your bag. You could also use your own food containers when buying food.

Take reusable water bottles

Instead of buying bottled water, use a reusable water bottle that you can fill up throughout the day. You'll cut down on plastic and save money!

Avoid food packaging

Fruit and vegetables in supermarkets are often wrapped in plastic. Make it a point to buy loose fruit and vegetables. Again, you'll reduce plastic use and your grocery bills.

Making just a few minor changes to our day-to-day habits goes a long way toward protecting our environment. So, why not start today?
