III. Cloze 16%

The 3D printer is a machine that can create three-dimensional solid objects. In the printing process, the printer adds layers upon layers of materials until a solid object is completed. 33 , 3D printers only made small, simple plastic objects. But now, 3D printer technology can help house builders know the exact amount of materials they need even before they start construction. Therefore, building 3D printed homes requires fewer resources and produces 34 waste than the traditional way.

The 3D printer can improve the quality of the objects they create by using artificial intelligence ( AI ). One of the most exciting applications of AI in 3D printing 35 generative design. Generative design is a computer-aided design technique that uses AI to improve the design process.

It helps create lighter and stronger structures. This is because AI can find the best way to reduce the weight of a structure 36 increasing its strength. In this way, better buildings can be created.
