### IV. Cloze

(1) Online dating is very popular today. It enables strangers to introduce themselves to new friends \_(35)\_ the Internet, usually with the goal of developing close relationship. Users need to get access to online dating services. \_(36)\_ some of these services are free, the others are not. Before users can use these online dating services, it is necessary for them \_(37)\_ "members" and upload their personal information. Besides, users \_(38)\_ to add photos or videos to their profiles for other members to decide whether they would like to make contact or not. Online dating services are \_(39)\_ available. The popularity of online dating services just shows how difficult it is for people to find partners in their everyday life.

35. (A) above (B) at (C) over (D) up  
36. (A) Since (B) If (C) Unless (D) While  
37. (A) become (B) becomes (C) to become (D) will become  
38. (A) encourage (B) encouraged (C) are encouraged (D) have encouraged  
39. (A) ease (B) easy (C) easier (D) easily

(2) Good health is one thing in life that money can't buy. You cannot buy it at any drugstore or get it \_(40)\_ by visiting the doctor when you are sick. Since the 1990s, many health experts \_(41)\_ an idea of wellness which suggests achieving the best possible health within the limits of your body. In terms of exercises, one person might prefer a lot of easier exercises to more \_(42)\_ exercises. Whereas some people enjoy playing one game of golf per week, others \_(43)\_ play a competitive game of basketball. The key indeed is to understand the needs of your body. However, nobody can avoid \_(44)\_ diseases. Poor diet and stress can damage your health as well. Thus, if you want to reduce the risk of developing diseases, the best advice is to change your bad habits or the conditions around you.

(3) Bees are amazing insects. \_\_(45)\_\_, they're more important than most people realize. All things considered, they \_\_(46)\_\_ a vital role on Earth. Without them, for example, growing enough food for everyone would be almost impossible. Certain fruits and vegetables, \_\_(47)\_\_ common ones like apples and cabbage, would disappear. Kiwi fruit and pumpkin would also be likely to disappear. Eventually, about half the crops we \_\_(48)\_\_ to feed ourselves and our farm animals would be gone. In time, meat and dairy products would also vanish.

In short, millions of people are likely to starve to death if bees are no longer around. In many ways, their survival is \_\_(49)\_\_ to our own. This is why it's so crucial that we do more to protect bees. However, \_\_(50)\_\_ treating crops with powerful chemicals, we are slowly killing them. Without them, where would we bee then?

- |                         |                 |                 |               |
|-------------------------|-----------------|-----------------|---------------|
