| 8. It is not easy to _____ between the twin sisters unless you look very closely. (A) distract (B) distinguish (C) shorten (D) spray | | | | | | | | | | | | | | | What you eat before you board a plane can change how you feel in the air or even after you land. Fast food, for instance, can upset your stomach because fats can lead to blocks in blood flow. Foods such as cauliflower or broccoli can make our bodies swell because the pressure in the cabin is lower, leading to an uncomfortable feeling. Drinking is just as important as what you eat, too. Alcoholic drinks cause the body to lose water, making you thirstier. Soda should also be avoided because the bubbles will expand like tiny balloons in your body. Lastly, treats like candy or cake are not great to eat before a flight because they contain non-natural sugars. The body is not designed to process these types of sugars well, and so they can cause gas, swelling, or make you run to the bathroom often- not what you want on a long flight! Try to avoid these foods the next time you fly, and you will enjoy your flight far more. |
