33. (A) as (B) for (C) by (D) to

34. (A) spanned (B) sampled (C) spoiled (D) disturbed

35. (A) corresponded to (B) come with (C) ended up with (D) started with

36. (A) with; on (B) by; on (C) with; off (D) by; up

### 四、文意選填(1 小題，每格 2 分，共 20 分)

作答時不需考慮大小寫

- |  |
|--|
| (A) sufficient (B) resistance (C) barriers (D) hygiene (E) promising       |
| (AB) came up with (BC) at a time (BD) such as (CD) income (AE) as a result |

In India, packs of poor children can often be found near train stations. They beg for money or collect recyclable things to sell. Some children come from low-\_\_ 37 \_\_ families. Others are from families of a lower social status. People try to break through social \_\_ 38 \_\_ and help these children, but often can't reach the poorest. Eventually, a teacher named Inderjit Khurana \_\_ 39 \_\_ an idea. She began teaching reading lessons on the train platforms. To reduce the children's \_\_ 40 \_\_ to the lessons, she made them more fun by singing and dancing. The solution seemed \_\_ 41 \_\_ as more children became interested in reading. \_\_ 42 \_\_, the first train platform school opened up in 1985. Without \_\_ 43 \_\_ school equipment, over one hundred children sat on the floor, learning with the aid of very simple resources. Each teacher taught twenty-five students \_\_ 44 \_\_. Students learned traditional subjects \_\_ 45 \_\_ reading, writing, and math. In addition to these subjects, children gained better understanding about the importance of \_\_ 46 \_\_. Thanks to the train platform schools, children from poor backgrounds get a chance at a better life.

### 五、閱讀測驗(1 小題，每格 2 分，共 8 分)

There is still a large portion of the world's oceans that we haven't yet studied, and scientists are making new discoveries all the time. One recent surprise came in the form of a squid that can fly. The scientists in Japan that discovered the flying squid believe that its flight involves four stages of movement. First, while it's swimming, the squid opens up the main part of its body to draw in water. Second, it launches itself into the air with a strong release of the water from its body. Third, once it's in the air, the squid spreads out its fins and limbs to form wings. Finally, those wings allow flying squid to glide in the air like a paper airplane.

Flying squid can stay in the air for about three seconds and cover around 30 meters per flight. While in the air, the flying squid doesn't just relax and go with the flow. Instead, it continuously changes its body position based on its distance from the surface of the water. Just before diving back into the ocean, the squid folds its fins and limbs to reduce the impact of its re-entry into the water. People have spotted groups of 20 or so squid flying together, and it is believed that—like flying fish—their flight is a way to escape danger in the water.

47. What is the main purpose of the passage?

- (A) To analyze why groups of squid fly together.
- (B) To appreciate Japanese scientists' efforts in making this amazing discovery.
- (C) To explain how flying squid make use of airflow.
- (D) To explain how and why flying squid move in the air.

48. For what reason does this squid fly?

- (A) To breathe in fresh air to survive. (B) To train its fins.
- (C) To avoid dangers underwater. (D) To demonstrate its superb flying skills.

49. What can be inferred from the passage?

- (A) The flying squid is a flying master when it comes to speed.
- (B) The flying squid is the only marine creature that can fly.
- (C) The flying squid constantly adjusts its position while in the air.
- (D) The flying squid can maintain a laid-back posture when in the air.

50. Which picture best represents the organization of the passage regarding how flying squid take flight?
