(A) phenomenon (B) category (C) solution (D) involvement

35. The rare species is in _____ of extinction due to habitat loss.

(A) safety (B) danger (C) curiosity (D) rate

三、閱讀測驗

In recent years, the rate of technological advancement has increased dramatically, causing significant changes in various industries. Researchers have produced impressive solutions to long-standing problems, from healthcare to environmental protection. One notable trend is the growing percentage of companies involved in developing eco-friendly products. These businesses are designing innovative items that reduce waste and minimize harmful chemicals. For instance, some have created household cleaners using natural ingredients, which are less harsh on the environment. In the field of science, biologists have made curious discoveries about certain bacteria species. These microorganisms can survive in extremely odd conditions, puzzling experts and sparking new discussions about life's adaptability. The tech industry has also seen remarkable progress. Engineers have designed websites and mobile applications that help users track their carbon footprint, encouraging them to decrease their environmental impact. Additionally, new electric vehicles are being produced at an increasing rate, offering an alternative to traditional gas-powered cars. However, these advancements are not without challenges. Critics argue that some technologies pose potential dangers to privacy and job security. There's an ongoing debate about how to regulate these innovations while still promoting progress. Despite these concerns, many believe that with proper safety measures and ethical considerations, these developments can lead to positive outcomes for society. As we move forward, it will be crucial to balance innovation with responsibility.

36. What is the main idea of the article?

- A. The rate of technological advancement has increased dramatically in recent years
- B. Researchers have produced impressive solutions to long-standing problems in various industries
- C. The tech industry has seen remarkable progress in the development of eco-friendly products and electric vehicles
- D. Advancements in technology come with challenges, such as privacy and job security concerns

37. What type of companies are developing eco-friendly products?

- A. Technology companies
- B. Healthcare companies
- C. Environmental protection companies
- D. None of the above

38. What does the field of science mention that has puzzled experts?

- A. Curious discoveries about certain bacteria species
- B. Impressive solutions to long-standing problems
- C. Advancements in the tech industry
- D. Growing percentage of companies involved in developing eco-friendly products

39. What are some ways that websites and mobile applications are helping users reduce their environmental impact?

- A. Providing information on eco-friendly products
- B. Tracking carbon footprint
- C. Designing electric vehicles
- D. Developing natural household cleaners

40. According to the article, what is the key consideration for future technological development?

- A. The impact on job security
- B. The potential dangers to privacy
- C. The rate of technological advancement
- D. Balancing innovation with ethical responsibility
