

市立新北高 113 學年度第 1 學期 補考 試題									班別		座號		電腦卡作答
科 目	汽車工 業英文	命題 教師	詹勳從	審題 教師	李峯松	年 級	二	科 別	汽車科	姓名			否

一、填充題（每格 5 分，共 100 分）：

1. When the clutch does not touch the flywheel, the transmission input shaft remains stationary.

當離合器未與_____接合時，變速箱_____保持不動。

2. Pressure forms in the system and the slave cylinder piston is slid outward.

壓力在系統內_____，此時分泵活塞便_____。

3. The clutch consists of a number of parts: clutch pedal, clutch release mechanism, release fork, clutch cover, release bearing, pressure plate and clutch disc.

離合器是由以下一些零件所組成：離合器踏板、_____、釋放叉、離合器釋放軸承、及_____。

4. When the driver releases the clutch pedal, the flywheel, disc, pressure plate and transmission input shaft would be locked together.

當駕駛人_____離合器踏板時，飛輪、離合器片、壓板和變速箱輸入軸便_____在一起。

5. A manual transmission must be shifted by hand.

_____變速箱必須以手來_____。

6. Transmissions with more forward speeds provide a better selection of gear ratios.

有更多_____的變速箱能提供較佳的_____選擇。

7. Vehicles with automatic transmissions do not need a clutch.

配備_____的車輛不需要_____。

8. The computer monitors engine speed, load, throttle position, transmission output shaft speed, gearshift position, and so on.

電腦可_____引擎的_____、負載、節氣門位置、變速箱輸出軸轉速、_____等等。

9. The stator is located between the impeller and the turbine.

_____是安裝在_____及被動葉輪之間。
