### Part I. Multiple Choices 40%

- Trying to convince Sarah to join our hiking group is \_\_\_\_\_ because she has always hated outdoor activities. (A) a couch potato (B) across the board (C) a fool's errand (D) in the black
- The doctor \_\_\_\_\_ the patient that the surgery would be successful and told her not to worry too much. (A) incorporated (B) overtook (C) reassured (D) pedaled
- Crossing the old bridge during a heavy storm is extremely \_\_\_\_\_. (A) risky (B) cognitive (C) descriptive (D) republican
- Emma has a(n) \_\_\_\_\_ resemblance to her grandmother: they both have the same auburn hair, distinctive nose, and warm smile. (A) striking (B) operational (C) terminal (D) spicy
- In \_\_\_\_\_ with university regulations, all students must submit their assignments through the online portal. (A) casino (B) compliance (C) thesis (D) equity
- Thanks to the \_\_\_\_\_ of rare books she received from her grandfather, Lisa now owns one of the most valuable private collections. (A) hypothesis (B) carnival (C) escalator (D) legacy
- Modern factories are trying to reduce carbon \_\_\_\_\_ to help combat climate change. (A) prophets (B) chapels (C) emissions (D) practitioners
- The company policy \_\_\_\_\_ that all employees complete safety training before operating any machinery. (A) mandates (B) disrupts (C) mortgages (D) incorporates
- With his constant complaints and refusal to cooperate, the new team member is more of a \_\_\_\_\_ than an asset. (A) liability (B) discourse (C) portfolio (D) filter
- James doesn't enjoy comedies or romance films. He prefers watching \_\_\_\_\_, and he's good at predicting plot twists. (A) bodyguards (B) biases (C) thrillers (D) sensors
- Kelly had never \_\_\_\_\_ herself as a business owner, but after creating a successful app, she embraced the role. (A) amended (B) torched (C) envisioned (D) overseen
- The student \_\_\_\_\_ his teacher's signature on the absence note to avoid getting in trouble with his parents. (A) yachted (B) stunk (C) browsed (D) forged
- When Alex made an inappropriate comment during the meeting, his manager gave him a fierce \_\_\_\_\_ that silenced the entire room. (A) carnival (B) warehouse (C) fad (D) glare
- The skiing accident \_\_\_\_\_ the professional athlete, ending his promising career permanently. (A) massaged (B) qualified (C) petitioned (D) crippled
- Travelers to many countries need to apply for a \_\_\_\_\_ in advance through their embassy websites. (A) visa (B) milestone (C) wig (D) trophy
- For the festival, children collected autumn leaves and berries to make a decorative \_\_\_\_\_ for the classroom door. (A) pedal (B) hockey (C) wreath (D) performer
- The economic recession is not \_\_\_\_\_ this region; it has affected businesses nationwide. (A) named after (B) confined to (C) responsible for (D) supposed to
- Always handle these \_\_\_\_\_ materials with proper protective equipment to avoid skin irritation or respiratory problems. (A) righteous (B) toxic (C) sympathetic (D) envious
- Several political \_\_\_\_\_ involving corruption were exposed, forcing the mayor to resign from office. (A) pulses (B) hormones (C) scandals (D) prodigies
- Beijing is often covered in \_\_\_\_\_ during winter months due to coal heating and vehicle emissions. (A) smog (B) salon (C) sector (D) sandal

ancestors and understand its cultural significance. When the last fluent speaker of a particular dialect passed away last year, community members (25) as they realized a piece of their heritage had been lost forever.

The declining usage of the Yilan Creole has (26) the importance of cultural preservation efforts. Local linguists work diligently to document this (27) language before it disappears completely. Some have created recordings where elders (28) traditional stories and poems in the original dialect.

Modern media and mainstream languages have become the primary (29) to traditional language preservation. However, cultural centers in Yilan offer language learning materials, ideally as a (30) for visitors, hoping to spark interest in this fading linguistic treasure.

### Part III . Reading comprehension 30%

Expo 2025 in Osaka, Japan showcases global innovation shaping our future. Among the international displays, Taiwan's TECH WORLD pavilion, created by a nonprofit foundation, stands out for its blend of technology and cultural heritage.

Inspired by Taiwan's mountain ranges, the pavilion utilizes recyclable materials that reflect environmental commitment while honoring the island's indigenous identity. This architectural approach establishes the pavilion's theme of harmony between technology and nature. The exhibition journey begins with immersive digital masterpieces, including AI art installations and advanced robotics. A central environmental section features simulated ecosystems that demonstrate how ocean pollution is affecting marine life and raising mortality rates among vulnerable species.

Transitioning from environmental awareness to cultural appreciation, the pavilion introduces visitors to Taiwan's cuisine through samples of traditional spicy snacks and offers locally crafted souvenirs. This cultural connection is enhanced by knowledgeable guides who explain each exhibit's significance.

Throughout the experience, carefully designed multimedia presentations engage multiple senses. Visual displays are complemented by subtle scent elements that often cause visitors to gasp in amazement at the immersive effect.

The pavilion's thoughtful design creates a clear correlation between innovation and emotion. By showing how traditional values can be inherited and adapted through technology, and by highlighting environmental challenges without exaggeration, Taiwan's exhibit becomes a serious rival to larger countries' displays. This unforgettable experience inspires visitors to opt for compassionate innovation in addressing global challenges.

#### 31. What can be inferred about the Taiwan pavilion's approach to environmental issues?

- A) It balances innovation with environmental awareness.
- B) It criticizes other nations' environmental policies.
- C) It focuses solely on technological solutions.
- D) It presents ecological problems with artistic flair.

#### 32. Based on the passage, what is likely the main purpose of including traditional Taiwanese cuisine in the exhibition?

- A) To promote Taiwan's food products globally.
- B) To connect cultural heritage with modern identity.
- C) To compete with other nations' food displays.
- D) To attract more visitors to the exhibition area.

#### 33. The author implies that the Taiwan pavilion differs from other countries' displays primarily through:

- A) Its blend of tradition, technology, and ecology.
- B) Its larger scale and elaborate installations.
- C) Its focus on multisensory visitor experiences.
- D) Its emphasis on indigenous cultural elements.

#### 34. What can be inferred about the intended emotional impact of the Taiwan pavilion on visitors?

- A) To foster pride in cultural achievements.
- B) To inspire compassion-driven innovation.
- C) To raise concern about environmental issues.
- D) To evoke nostalgia for traditional lifestyles.

#### 35. The passage suggests that the architectural design of the pavilion:

- A) Favors beauty over environmental concerns.
- B) Embodies the themes shown in the exhibits.
- C) Contrasts with Taiwan's natural landscape.
- D) Showcases advanced building techniques.

Modern homes are becoming smarter thanks to AI technology. Smart home systems connect different devices to make daily life easier and save energy. These systems can control lights, temperature, security cameras, and kitchen appliances through a central hub or smartphone app.

One key benefit is convenience. Imagine arriving home to find your lights already on, your favorite music playing, and the temperature just right. Your smart home can learn your habits and adjust automatically. You can also control devices with voice commands like "turn off the living room lights" or "lock the front door."

Energy efficiency is another advantage. Smart thermostats learn when you're home and adjust heating or cooling accordingly. They can reduce your energy bills by 10–15%. Smart lights turn off automatically when rooms are empty, helping to further cut energy waste, and smart plugs can shut down devices that use power even when not in use.

Security improves with AI-powered systems that can recognize family members' faces and alert you to strangers. Smart locks let you give temporary access codes to visitors and track who enters your home.

While setting up a smart home requires some investment, you can start small with a few devices and add more over time. The technology is becoming more affordable and user-friendly, making smart homes accessible to more people. As AI continues to develop, our homes will become even more responsive to our needs, offering smarter predictive features like anticipating your needs before you even ask.

**36. What is the main purpose of a smart home system according to the text?**

- A) To collect data about your habits
- B) To increase property values
- C) To replace traditional home appliances
- D) To make daily life easier and save energy

**37. How do smart thermostats help homeowners?**

- A) By controlling security cameras
- B) By recognizing family members' faces
- C) By playing music when you arrive home
- D) By reducing energy bills through adaptive heating and cooling

**38. According to the text, smart home users can control their devices by:**

- A) Using voice commands or a central hub
- B) Installing special buttons throughout the house
- C) Paying a monthly subscription fee
- D) Using only a smartphone app

**39. What does the article suggest about setting up a smart home?**

- A) It can be done gradually, starting with a few devices
- B) It needs to be completed all at once
- C) It is too expensive for most people
- D) It requires professional installation

**40. What can be inferred about the future of smart home technology?**

- A) It will be limited to luxury homes
- B) It will become more responsive to homeowners' needs
- C) It will be replaced by newer technology soon
- D) It will become more expensive over time
