34. (A) transported (B) transport (C) transporting (D) by transporting
35. (A) import (B) decorate (C) report (D) operate

IV. Reading Comprehension Questions (2*5=10%)

The scientific name for the cacao tree, *Theobroma*, means “food of the gods.” Chocolate was first discovered in Central and South America, where ancient cultures valued cacao for its taste and symbolism. Archaeologists have found cacao residue from the Mayo-Chinchipeculture in Ecuador over 5,300 years ago, making it the earliest known user of chocolate. Later, the Olmecs of southern Mexico cultivated cacao around 1750 BC and passed their knowledge to the Mayans. In Mayan society, everyone could enjoy chocolate, and cacao beans were used as currency and in religious ceremonies. The Aztecs later created a cold, bitter chocolate drink called *xocoatl*, while the Mayans preferred it warm. Both flavored their drinks with chili pepper, vanilla, allspice, and honey. The Aztecs considered cacao beans more valuable than gold, and their rulers, like Montezuma II, drank large amounts daily for energy and as an aphrodisiac. They also believed chocolate had medicinal powers, using it to relieve stress and promote vitality among high-ranking officials.

36. Where was chocolate first discovered?
- (A) Europe (B) Central and South America (C) Asia (D) Africa
