24. (A) steep (B) expansive (C) violent (D) immense
25. (A) conquered (B) resided (C) stood (D) endured

III. Reading Comprehension Questions (2*5=10%)

In the past decade, artificial intelligence (AI) has rapidly transformed how people live, work, and communicate. AI refers to computer systems designed to perform tasks that normally require human intelligence, such as learning, reasoning, and problem-solving. Today, AI is everywhere—from voice assistants like Siri and Alexa to self-driving cars and facial recognition software.

Businesses rely on AI to analyze data, improve customer service, and even predict consumer behavior. In healthcare, AI helps doctors diagnose diseases earlier and design personalized treatments. While these innovations offer great benefits, they also raise important questions about privacy, security, and employment. Many people worry that machines could replace human workers, especially in manufacturing or customer service. Others fear that AI systems may collect too much personal data or make unfair decisions.

As technology continues to advance, experts emphasize the need for ethical guidelines to ensure AI benefits society as a whole. The challenge is finding a balance between innovation and responsibility—so that AI can enhance human life without reducing human value.

- 26.Which of the following is NOT mentioned as an example of AI?
- (A) Voice assistants
- (B) Self-driving cars
- (C) 3D printers
- (D) Facial recognition software
27. What is one benefit of AI in healthcare?
- (A) It replaces doctors completely
- (B) It helps diagnose diseases earlier
- (C) It reduces the cost of medical school
- (D) It eliminates patient records
28. What concern do some people have about AI?
- (A) It will make the internet slower
- (B) It may invade privacy or take jobs
- (C) It will stop producing new data
- (D) It will only help scientists
29. What is Alexa?
- (A) A voice assistant that uses AI
- (B) A self-driving car system
- (C) A medical diagnostic tool
- (D) A data security program
30. What is the main idea of the passage?
- (A) AI is dangerous and should be banned
- (B) AI brings both opportunities and ethical challenges
- (C) AI is only useful in business and medicine
- (D) AI will soon replace all human work
