(1) When a crime occurs, it leaves a crime scene to be investigated. Few people think about who cleans it all up once the police have finished with it. Those who clean up the crime scene are called crime scene cleaners. Obviously, their work can be quite unpleasant, but that is not all it is about.

Most of the work they do is from suicides or people that have died naturally but were not found for some time. They receive special training that involves cleaning fake crime scenes using pigs’ blood before they work individually.

Crime scene cleaning is not as simple as cleaning a room. When bodies start to break down, the strong smells they create fill the whole room. Crime scene cleaners need to clean everything nearby with special equipment and chemicals to **get rid of** these smells.

Naturally, this job can affect workers emotionally. As a result, cleaners often **require** professional counseling. After knowing what this job is about, would you want to be a crime scene cleaner?

1. What is the passage mainly about?

(A) Mental support for crime scene cleaners. (B) Ways to effectively erase stains and smells.

(C) Facts about working as a crime scene cleaner. (D) Training for future crime scene cleaners.

2. Which of the following is “true” according to the passage?

(A) Most cases they work on are not murders but natural deaths or suicides.

(B) After crime scene cleaners clean a place, the police will investigate the cause of death.

(C) Crime scene cleaners work with professional counselors at the scene.

(D) Strong smells on the crime scenes can be gotten rid of by pigs’ blood.

3. Which of the following can be inferred from the passage?

(A) Crime scene cleaners mainly work outdoors.

(B) Crime scene cleaners must work wherever they are needed

(C) Crime scene cleaners have a high suicide rate.

(D) .Crime scene cleaners don’t have to be trained.

4. What does the phrase “get rid of ” mean?

(A) 接受 (B) 影響 (C) 去除 (D) 創造

5. What does the word “require ” mean?

(A) 需要 (B) 調查 (C) 充滿 (D) 分解

(2) Each year in Japan, an increasing number of Japanese are dying alone. Nobody notices that these people are dead until their bodies start to decay and give off a terrible smell. This phenomenon results from the fact that Japan’s population is aging fast, and that there are more and more Japanese who stay single nowadays. According to survey, over 25% of the people in Japan are above the age of 65. With almost half of its population expected to be elderly by 2050, and ties between family members gradually being broken, many elderly people’s deaths and disappearance go completely unnoticed.

In order to **deal with** this problem, a number of cleaning companies have emerged in Japan. These companies specialize in cleaning up dead bodies and their messy apartments. They go in with disinfectants and **protective** clothing to clean up dirty houses where the elderly lived alone. The places are usually filthy and full of trash. Some experts believe that there are 30,000 people who die alone in the country every year. Therefore, these clean-up services are here to stay.

6. What is this passage mainly about?

(A) Deaths of single Japanese and cleaning companies.

(B) The increasing generation gap in Japan.

(C) The reasons why many Japanese people stay single.

(D) Global problems and diseases which may cause death.

7. Based on the passage, why are many elderly people’s death unnoticed?

(A) It’s because they are old.

(B) It’s because of their low incomes.

(C) It’s because they live alone.

(D) It’s because of their terrible body smells.

8. According to the passage, which is “NOT true” about the cleaning companies?

(A) They clean up dead bodies as well as their apartments.

(B) They experience trauma from doing the job.

(C) The apartments they clean up are normally full of garbage.

(D) Wearing protective clothing when doing their job is a must.

9. What does the phrase “deal with” mean?
(A) 減少 (B) 增加 (C) 出現 (D) 處理

10. What does the word “protective” mean?
(A) 保護的 (B) 避免的 (C) 破壞的 (D) 髒的

(3) In movies or television series, there is a group of people risking their lives to perform difficult or dangerous actions. They are called stunt performers. With professional training in skills and physical motions, stunt performers **are responsible for** replacing actors or actresses to accomplish the risky fighting, explosion, or car chase scenes. To be a stunt performer, one must have not only **courage** but highly trained skills. In addition to keeping fit, a good stunt performer also has to take notice of what the actor or actress does. They need to mimic the actors’ voices, movements, and some trivial behaviors so as to make the performance more convincing to the audience. To avoid getting hurt, stunt performers have to be very careful and focus on the shooting scenes. Being a stunt performer seems to be a life-and-death career, but it is certainly a meaningful job.

11. What is the passage mainly about?
(A) How stunt performers replace actors or actresses in a movie.
(B) How stunt performers behave to attract more audiences.
(C) What stunt performers’ jobs are and their requirements.
(D) What challenges stunt performers may face in television series.

12. Which of the following is “NOT” what stunt performers need to mimic?
(A) The actors’ or actress’ walking behavior. (B) The actors’ or actress’ movements.
(C) The actors’ or actress’ voices. (D) The actors’ or actress’ tastes.

13. According to the passage, why is being a stunt performer a life-and-death career?
(A) It is because he or she always mimics what the actors say.
(B) It is because he or she usually performs dangerous actions.
(C) It is because he or she needs to be physically well-trained.
(D) It is because he or she will replace leading actor or actress.

14. What does the phrase “be responsible for” mean?
(A) 負責 (B) 反對 (C) 說服 (D) 模仿

15. What does the word “courage” mean?
(A) 行為 (B) 爆炸 (C) 勇氣 (D) 技巧

(4) With the rise of AI, supercomputers have become more important than ever. These powerful machines can process large amounts of data quickly. They help drive **innovation** and improve efficiency in the modern economy. Increasingly, governments and companies are building advanced supercomputing systems.

Around the world, supercomputers have already made an impact in various fields. During the pandemic, a supercomputer helped scientists isolate and identify the spike protein (棘蛋白) in COVID-19 virus. **It** analyzed and compared samples from different countries to better understand the spike protein. Hopefully, supercomputers will also contribute to developing cures for cancers that have remained challenging for years. Another area supercomputers can be used in is wind power production. They can help predict climate factors and improve the efficiency of wind farm performance.

In Taiwan, supercomputers have been providing services that **benefit** both businesses and the public. For instance, the Taiwan Computing Cloud supercomputer helps pig farmers select healthy young pigs and predict the growth of these pigs. The selection starts when the pigs are just seven days old. In this way, it saves time, reduces costs, and enhances livestock quality. Another supercomputer system, the Central Weather Bureau’s supercomputer, improves the accuracy of weather forecasting and strengthens Taiwan’s earthquake early warning system. It is worth mentioning that the powerful supercomputer at the National Health Research Institutes supports advanced biotechnology and pharmaceutical projects. This contributes to better health of the population.

In conclusion, supercomputing is not just about technology; it is also about shaping the future. As computing power increases, it will enable more innovation and new creation.

16. What is the main idea of this passage?
(A) The use and impact of supercomputers. (B) The medical practice of supercomputing.
(C) The theories of supercomputing (D) The pros and cons of supercomputers

17. What does “It” in the second paragraph refer to?
(A) an impact (B) the pandemic (C) the spike protein (D) a supercomputer
18. According to the passage, which function is “NOT” mentioned in the third paragraph?
(A) Helping people become healthier
(B) Improving Taiwan’s livestock quality
(C) Enhancing wind power performance
(D) Providing more accurate weather forecasts
19. What does the word “innovation” mean?
(A) 創新 (B) 傳統 (C) 預約 (D) 因素
20. What does the word “benefit” mean?
(A) 減少 (B) 區別 (C) 損害 (D) 受益
